

Refund Policy

Merchants processing transactions on the Mastercard network must maintain and honor a clearly defined refund policy. Credio requires that merchants process refunds within 30 days of a valid refund request and that cardholders are notified when a refund has been initiated or declined.

When this policy applies

This policy applies to all transaction types where a cardholder requests a refund directly from the merchant, as distinct from a chargeback dispute initiated through the card network. Merchants must not require cardholders to return goods before issuing a refund when the goods are non-returnable by nature.

Required actions

1. Accept refund requests within the 30-day window following the original transaction.
2. Partial refunds are permissible where a portion of the goods or services is non-defective.
3. Notify the cardholder in writing (email or in-app notification) when the refund is processed or when a refund request is declined.
4. Retain refund transaction records for a minimum of 18 months.
